## Experience

---

### - **Expensify**

*Director of Engineering*

Boise, ID (Remote)

*December 2021 – Current*

- Led [open source rewrite](#) of Expensify front end to React Native.
- Created a partnership between Expensify and Meta that boosted ecosystem visibility, improved access to platform roadmap, and positioned Expensify as a reference implementation for an enterprise React Native app.
- Presented Expensify's open source React Native rewrite at the Chain React 2023 keynote ([video](#)) with 300+ attendees.
- Created external developer program with over 2,000 external developers supplementing internal Expensify engineering team.
- Organized Expensify developer conference, ExpensiConX, in Curaçao.
- Led [award winning](#) employee equity program during 2021 IPO which granted over \$260MM of \$EXFY equity to employees.

### - **Expensify**

*Lead Mobile Engineer*

San Francisco, CA

*April 2016 – December 2021*

- Implemented interactive mobile Super Bowl commercial, "[Expensify This](#)", viewed by 100 million people.
- Led year long project to create [new subscription plans](#) introducing a new revenue stream.
- Managed mobile roadmap and release schedule for the Android and iOS Expensify app.
- Empowered team of six mobile engineers through countless features and multiple major refactors to modernize the mobile application.
- Responsible for leading on-site interviews and the screening mobile hiring process.
- Applied knowledge across entire company including numerous marketing campaigns, support procedures, and design decisions.

### - **Expensify**

*Mobile Engineer*

San Francisco, CA

*August 2015 – April 2016*

- Collaborated across departments to release multiple features to over 10 million users.
- Worked remote for four weeks in Cambodia and Thailand to improve mobile onboarding.
- Introduced beta testing program and shortened release cycle of the mobile app by two months.

## Projects

---

### - **CCS Alerts**

*June 2017 – November 2019*

- Built company to help Flight Attendants reduce time spent configuring their schedule.
- Developed go to market strategy and marketing plan to scale business to thousands of users.
- Executed customer support to identify bugs and evaluate feature requests.
- Implemented iOS mobile app and scalable Firebase serverless backend to send millions of push notifications monthly.
